

Connecting a Cloud Adapter 8 or 16 to your security system.

.videoloft

What you'll need

Videoloft Cloud Adapter

Cloud Adapter power supply

Ethernet cable

Spare port on the router or switch which your **security system** is connected to

How to connect

Step 1

Connect the ethernet cable to a spare port on your internet router or switch

Step 2

Then connect the ethernet cable to the Cloud Adapter

Step 3

Finally, connect the Cloud Adapter to power

It is important that this is done **after** the internet connection.
